- Denmark meeting: game changer
- Strategy is networking and supporting

EUROPEAN NETWORK OF LAW ENFORCEMENT TECHNOLOGY SERVICES

ENLETS Mission

- ENLETS supports *front line policing* and *the fight against serious and organised crime* by gathering user requirements, scanning and raising awareness of new technology and best practices, benchmarking and giving advice. It is active in joint initiatives, sharing information and networking between law enforcement agencies, industry and research organisations. It is a point of contact to access European law enforcement technical organisations

ENLETS Technology scope

- Sharing Best Practices: EDBP project
- Co- Creation
- Research : H2020 / SAG

Council Conclusions on ENLETS

Tasks for the Core group:

To organize a technology watch function for internal security research and industrial policy tasks in Europe

To serve as a central contact point for Member states, Research and industry, Agency 's and the Commission with the capability to have the overview on security needs

To report to the LEWP and COSI

The Council invited the Member states:

To promote and participate in Enlets and nominate a NCP

To ensure a Core group capable of executing its task
